Core Values comprise the following:

Innovation, Integrity, and Accountability

Our Statement of **Quality Policy**

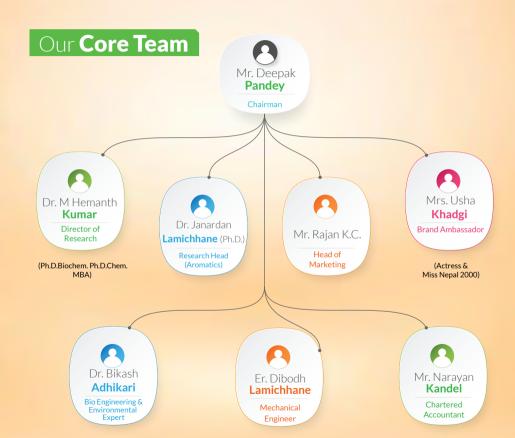

Larke Himal always puts its customers first, and provide Solution, service & satisfaction.

- We strive to solve customers' problems by developing products they need.
- We strive to service our customers with those special products via effective marketing strategies.
- We strive to give utmost satisfaction to our customers.

are committed to the consistent provision of quality products and services that will satisfy the demands and expectations of the customers by continual improvement of the Quality management system and conforming to local standards and prevailing codes of practice.

Mr. Deepak PANDEY

Our quality comes from cultivating herbs till manufacturing under one quality system of Larke Himal.

Message from Chairman

I have been working in the Herbal sector from cultivation and supply of herbs for the FMCG, medicine and cosmetics industries for more than 25 years. With extensive experiences and in-depth expertise, I have expanded my expertise into the Healthcare products beginning with cosmeceuticals and worked to come up with innovative technology in materials and formulation. Such efforts to meet the demands and needs of our customers led me to start my own business in the area of developing Natural cosmetics materials & Products.

Larke Himal is an expert specializing in developing Healthcare products like Nutraceuticals, Functional foods and personal care products developed from Natural or Natural derived materials with our experts who have more than 25 years of experience in the field. We focus on developing and manufacturing functional products as well as improving them. The products of focus include Hand made organic soaps from Himalayan aromatic oils, Herbal shampoos, Herbal Hand wash, Herbal toothpaste, Aromatic oils, Essential oils, Herbal extracts, organic Mom&Baby care products, Body serums etc. Aromatics are our thriving brand for manufacturing aromatic and essential oils from Himalayas.

We also create high added value through natural-material based cosmetics, natural pigments, natural extracts, natural oils and natural complex materials. Larke Himal is creating high-functioning materials based on materials technology combined with surfacing and natural ingredient extraction Technologies and developing formulations. Larke Himal will continue innovating skin-friendly surfacing cosmeceuticals, effective and safe materials for skin through developing relevant core technologies. We will strive to leap forward as a global leader in the industry by introducing a variety of materials and products. And we believe in backward integration and sustainability.

Message from R&D Director

Our R&D begins from farming of quality herbs and sustainability and empowering local farmers with herbal cultivation

We will continue advancing R&D to "create value" that society truly needs and contribute to realizing a prosperous society while supporting the sustainability of our operations, both economically and environmentally.

The fundamental objective of research and development is to create value-value for our company and value for society. At Larke Himal, we are constantly seeking to develop technologies that meet the needs of customers and provide solutions for society. The success of our company is rooted in our ability to continue improving our existing technologies while also innovating new technologies that provide solutions for the changing needs of society.

R&D Division is seeking to create technology that provides value to society in the form of function, quality, and price. With our society becoming both more diverse and more complex, we are currently developing a full palette of technologies focused on specific issues where our technologies have the potential to provide solutions.

We will continue seeking to create new value by improving our existing technologies, innovating new technologies, and producing a steady stream of new products and new businesses. We are maximizing our R&D capabilities by improving intercommunication across the Group to realize the full potential of our synergies. We will also seek out partnerships with companies, groups, and research institutions that can serve as catalysts to achieving our goals.

We are working to improve our existing technologies and innovate new technologies and products to meet the changing needs of society. Our efforts today will provide the foundation to ensure our business continues to flourish tomorrow. We will continue to create value to share with society.

Dr. Hemanth Kumar Manikyam

Brand Ambassador's Words

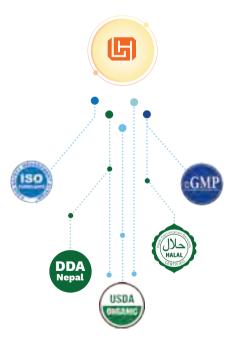

"I have always been a big fan of Natural products, that makes my skin blend with nature." I like how the brand turns Natural cosmetics into a form of self-expression which always gives me great confidence on stage. Together with Larke Himal's Brand , I am excited to invite and empower more audiences as we both have individuality and diversity at our core.

Usha KHADGI

(Actress & Miss Nepal 2000)

Our **Certification**

Our **Top Brands**

Manufacturing Facilities

Premium Himalayan quality cosmetic products enjoy an excellent reputation both domestically and abroad, Exclusivity. tradition, and high-quality ingredients in particular are all persuasive factors in the demanding cosmetics market. As a Himalayan cosmetics manufacturer, Larke Himal Cosmetics is the right partner to have at your side. Our cosmetic products are developed and manufactured exclusively in Nepal at Himalayan ranges.

- Luxury cosmetics appeal to discerning customers who place high value on beauty and skin care.
- Our Quality starts from farming of herbs till manufacturing under one roof
- 'Made in Nepal with International Technologies' is an established quality mark for cosmetics that your customers can trust. This means your products stand out radically from the competition.
- Quality cosmetics are based on the very latest research. Medical findings are incorporated into the further development of existing cosmetic formulations. For our natural cosmetic products, we use certified natural ingredients.
- First class ingredients and high-quality standards are the best foundation for high-quality cosmetics and skin care products, and thus for the success of your company.
- Tradition forms values. Cosmetics from Himalayas are well established on the market. The manufacture of

- cosmetics in the region creates the optimum conditions for long-term collaboration - all in the interests of your cosmetic product lines.
- We are specialist manufacturers of cosmetics for corporate customers.

By employing a strong infrastructure and efficient production processes, Larke Himal provides you with the safest quality OEM, ODM cosmetic manufacturing available. Our factories and facilities stand out for their capabilities on space, line chain, use of state-of-the-art technology and most efficient professionals.

Manufacturing Facilities

We make sure that every step of the production process is performed with high efficiency, accuracy, and safety. In the beginning we conduct the import and inspection of raw ingredients & packaging of materials. After that, we do quality testing to make sure that our products are 100% safe and effective. Finally, we verify that our products are identified and measured efficiently with our barcode system. Once all these tests and inspections are completed, products are moved to our warehouse and made ready to ship to our customers.

All of our natural beauty products are developed and made in a family owned & operated green beauty facility on Hills of Himalayas,we test every clean cosmetic product endlessly until we can guarantee our cruelty-free cosmetic brand delivering healthy skincare benefits for optimal performance. What sets us apart from the current cosmetic landscape is that we are entirely vertical. We have our labs, offices & warehouse under one roof in our green beauty facility in Kathmandu, Nepal. Our lab allows us to continuously work on new & exciting formulas. Our machinery provides the capabilities to produce in high volume quantities. We have full control and flexibility to ensure our products are made with minimal waste & maximum freshness

We use the latest in sustainable skincare technology to create products that are good for people & the planet. Silicone alternatives replicate the silky, high-performance textures of conventional products but are biodegradable. We also vet every supplier to ensure our materials come to us ethically &responsibly.

We're not perfect but we are actively learning. As we move forward, we are transitioning to post-consumer recycled plastic & glass bottles. We are continually educating ourselves on sustainability so that every step from product development to distribution has a net zero carbon footprint.

We'll always be real with you. We pride ourselves on developing a brand that is founded on transparency. All of our products are manufactured in our family owned and operated with a facility that promises to stand by the integrity of our ingredients. We're terrible at keeping secrets anyway, so ask us anything!

Essential Oil

"Our Essential Oils are 100% natural and concentrated"

Aromatic™

Essential oils are volatile aromatic compounds that are extracted (usually by using steam, water, and heat) from various parts of plants — roots, bark, wood, leaves, grass, flowers, fruits, seeds or resin. The vapor is then cooled in a condenser, which returns the essence to a liquid form. There's also a cold-press extraction method, which is commonly used for citrus essential oils. Essential oils don't just smell nice — they can have a powerful impact on your mood, skin and more.

Range: Lemongrass | Citronella | Basil | Black Cardamom Turmeric | Ginger | Mentha | Juniper | Rosemary | Lavender Frangipani | Wintergreen | Eucalyptus | Cinnamon

How to use Essential oil?

Method 1: Inhalation: Gently inhale from the bottle throughout the day, or add a few drops to a diffuser. You can even add a drop to your pillowcase at night.

Method 2: Topical application: This method allows your body to absorb the oil and for it to pass through your bloodstream and is an obvious application for skincare. Topical application is also appropriate for treating isolated areas, pain, muscle aches and inflammation, noting that rollon applications are convenient and easy for small areas of treatment.

Benefits of Essential Oils

- Boost mood.
- Improve job performance through reduced stress and increased attentiveness.
- Improve sleep.
- Kill bacteria, funguses and viruses that causes skin & hair dieses.
- Reduce anxiety and pain.
- Reduce inflammation.
- Reduce nausea.
- Relieve headaches.

Note: You should dilute our essential oil with your carrier oil before using tropically.

Some Words of Caution: Some oils are dermal irritants and can cause redness and allergic reactions. Not all the essential oils are supposed to ingest.

Read the label of each essential oil carefully. If you are under medication or in case of itches or rashes, consult with health professional before use.

Hemp Basics

- Hemp derived cosmetics

Hemp derived cosmetics have antioxidant and nourishing, moisturizing, soothing properties - these are just some of the properties of hemp, which stands out in the cosmetic field for all its benefits. In particular, its regenerating and nourishing characteristics make it a valuable ingredient. Hemp seed oil based products are beneficial for skin and hair as it is rich in Vitamin E, Omega 3, Omega6 polyunsaturated fatty acids and Gamma Linoleic Acid.
